

Comparative Political Economy

Spring 2025

Instructor: Mads Andreas Elkjær (mael@ifs.ku.dk)

Class time and location: Tuesdays 10.00-12.00 @ CSS 2-2-30

Office hours: By appointment (just shoot me an email)

Course Description

This course will introduce students to the major debates in the field of Comparative Political Economy. With a focus on advanced democracies (North America, Western Europe, East Asia), we will discuss topics such as why some countries are more unequal than others, why some countries redistribute more than others, how welfare states differ across countries, how globalization and technological change (digitalization, AI, robots) are transforming politics and the economy, how people form their preferences over redistribution and taxation, how rising property prices affect political preferences and policies, and more.

After taking the course, the students will have gained knowledge of the classic debates in Comparative Political Economy as well as of new developments in the field. This knowledge is essential for understanding the contemporary politics of advanced industrial societies.

Course Format

The course will be taught seminar style, meaning that it presupposes active participation of all students. Each class will start with a student presentation (max 7 min) covering what we discussed in the previous week and how it connects to the current week's readings. For the presentations, the presenting student(s) must upload a **one-to-two-page summary** on Absalon ahead of class; after the class the student(s) will upload a new, revised version of the summary reflecting the comments received during the initial class discussion. At the end of the semester, we will thus collectively have produced a set of notes covering all sessions. The students who are not presenting in a given week should prepare comments to the summaries and one to three reactions (comments or questions) to the week's reading. These reactions will be incorporated into the class discussion.

Summaries

The aim of the summaries is to condense the main takeaways from the class. The goal is **NOT** to summarize the readings; you already have summaries in the form of abstracts. Therefore, do **NOT** write yet another abstract for a paper or book. Instead, describe (briefly) the key arguments of the different readings, how they relate to each other, and summarize the key takeaways from the class discussion. The summaries should be a collective set of notes, meaning that all students are responsible for the final product, and that each student will have to take a full set of notes only once during the semester.

Exam

The exam consists of a term paper submitted towards the end of the semester (the exact deadline is May 27th at noon). In the paper, you must formulate an independent research question, develop a research design that allows you to answer the question, and present an empirical analysis. The paper can make use of qualitative or quantitative data. It is also possible to submit a 'critical discussion paper' of a specific topic/question

relevant to CPE. Such papers must be motivated by and engage heavily with the existing literature, and seek to formulate and advance some theoretical argument. The use of AI to write term papers is strictly forbidden.

During the semester **you have two opportunities to receive feedback on the idea for your term paper**. First, you will have the opportunity of submitting an extended abstract (max 500 words) in which you motivate your research question and describe a plan for how you can feasibly answer it (you can send me your abstract at any time during the semester and I will get back to you within a few days). Abstracts are submitted to me directly via email (mael@ifs.ku.dk) and you choose when you're ready to receive feedback. In the last session, you will then have a chance to present your research design and preliminary analysis and receive feedback from your peers. Students will read and provide comments on each other's term papers. Note that these offers are meant as a help to you, and you can choose to make use of them or not (in other words it's not mandatory to submit an abstract or to present at our presentation seminar).

If you're a master's student and write alone, the term paper can be up to 12 standard pages (28,800 key strokes); if written together with one colleague, it can be up to 15 standard pages (36,000 key strokes); if written together with two colleagues, it can be up to 20 standard pages (48,000 key strokes).

If you're a bachelor's student and write alone, the term paper can be up to 8 standard pages (19,200 key strokes); if written together with one colleague, it can be up to 10 standard pages (24,000 key strokes); if written together with two colleagues, it can be up to 12 standard pages (28,800 key strokes).

Class Schedule and Readings

The readings provide the basis for the discussion in class, and **it is therefore critically important that you read the assigned readings ahead of class**. You are expected to arrive thoroughly prepared to class and to contribute actively to all discussions.

Some of the readings include formal theoretical models, please don't spend too much time trying to understand the technical aspects of the models. Instead, focus on the logic of the theoretical argument, the key intuitions,

and the empirical evidence in the papers. After reading the papers, you should be able to answer the following questions:

- What is motivating the study and what is the research question?
- What is the argument and how does it differ from previous accounts?
- What is the research design and what evidence is provided?
- What conclusions are reached?
- Do you find the argument and/or the empirical analysis convincing? why or why not?
- How might the research be improved?
- How does the study contribute to our understanding of political economy?
- Which new questions does the study raise?

All readings will be available online either through the library (kb.dk), Absalon, or the links in the syllabus.

1. Introduction & Welfare Regimes (February 4)

- Esping-Andersen, Gøsta. 1990. *The Three Worlds of Welfare Capitalism* Cambridge, UK: Polity Press, chapters 1-3 [link to book here]

Recommended Readings:
